PROFILE

Shopify and frontend developer with **nearly two years of hands-on experience** working in **HTML5, CSS3, JavaScript and Liquid**. Have built and launched **six Shopify storefronts** on the Dawn, Essence and Elixir themes — mega-menu navigation, collection and product templates, review and newsletter sections, on-page SEO and full checkout setup. Comfortable editing Liquid templates and writing custom HTML, CSS and JavaScript when the theme editor runs out of options. Currently building depth in responsive layout, theme customization and store performance. **BS Information Technology, University of the Punjab.**

SKILLS

Frontend	HTML5 and semantic markup, CSS3 (Flexbox, Grid, media queries, transitions), JavaScript ES6 basics — DOM manipulation, event handling, functions, arrays and objects
Responsive Design	Mobile-first layouts, breakpoints for mobile / tablet / desktop, cross-browser testing in Chrome, Safari and Firefox
Shopify	Online Store 2.0 theme customization, Liquid basics (objects, tags, filters, loops), sections and blocks, theme settings, navigation and menus, page and blog templates, cart and checkout setup
Themes	Dawn, Essence, Elixir — section reordering, custom colour and typography settings, and custom code where the editor stops
Store Setup	Product and variant uploads, collection structure, shipping and payment configuration, policy pages, discount codes, newsletter capture, app installation and configuration
SEO Basics	Page titles, meta descriptions, image alt text, Open Graph and Twitter card tags, image compression
Tools	VS Code, Git and GitHub, Chrome DevTools, Shopify admin and theme editor, Canva, Google Analytics
Working Style	Clear written updates, attention to detail on design handoffs, tidy commented code, and a habit of testing the full buying flow before handover

EXPERIENCE

Shopify Developer — *Devoid Solution* *June 2025 – Present*

- Develop and customize Shopify storefronts on Online Store 2.0 themes — sections, blocks, theme settings, navigation and page layouts for client stores.
- Write custom Liquid, HTML, CSS and JavaScript sections where the theme editor runs out of options, keeping code tidy and commented.
- Build responsive, mobile-first layouts and test stores across mobile, tablet and desktop and in major browsers.
- Configure products, collections, apps, shipping and payments, and test the full buying flow before handover.

Shopify Developer — *HiveNexis, Lahore* *January 2025 – May 2025*

- Built and customized Shopify storefronts on Online Store 2.0 themes — sections, blocks, theme settings, navigation, and homepage, collection and product page layouts.
- Edited Liquid templates and wrote custom HTML, CSS and JavaScript for sections the theme editor does not cover.
- Set up product catalogs, variants, collections, shipping, payments and policy pages, then tested the full checkout flow before launch.
- Made stores responsive across mobile, tablet and desktop, and checked them across major browsers.
- Installed and configured apps for reviews, upsells and email capture, keeping only what each store actually needs.
- Handled on-page SEO before handover — page titles, meta descriptions, alt text and image compression.

SHOPIFY STORE PROJECTS

Musically Unhinged — *Humour apparel and gifts for musicians* · Dawn theme musicallyunhinged.com

- Built a three-group mega menu — by instrument, by audience and by shopping style — with nested seasonal submenus, plus a predictive search drawer showing collections and trending products.
- Set up product cards with colour swatches, compare-at pricing and percent-off badges, star ratings and add-to-cart straight from the collection grid.
- Added tabbed product sections, an eight-tile collection grid, brand-story block, verified-review section, blog, benefit icon row and a partner logo slider.
- Configured on-page SEO — page titles, meta descriptions, Open Graph and Twitter card tags — plus newsletter capture and social links.

Bedevia — *Korean skincare and beauty store* · Elixir theme bedevia.com

- Built a four-collection storefront — Best Sellers, Skincare & Collagen, Body & Hair Care, Sun Protection & SPF — with a rotating promo announcement bar, hero banner and trust-badge row.
- Added ingredient-education sections (Vitamin C, Hyaluronic Acid, Niacinamide, Aloe Vera), before-and-after comparison imagery, and a customer-review section linked to the products purchased.
- Set up sale pricing with savings badges, quick add-to-cart, blog, newsletter signup, policy pages and wallet payments (Apple Pay, Google Pay, Shop Pay, PayPal).

SpydrGuard — *multi-enzyme laundry sheets for combat-sport athletes* · Dawn theme, custom-coded sections spydrguard.com *pre-launch, password-protected*

- Built a single-page, custom-coded landing storefront with anchor navigation (Shop, The Science, Subscription, Reviews, FAQ), a sticky header with NOK / EUR / USD currency switcher, and a numbered 11-section layout from hero to email capture.
- Wrote custom HTML, CSS and JavaScript sections beyond the theme editor — a SpydrGuard-vs-regular-detergent comparison, four-card ingredient explainer, three-step protocol, swipeable discipline carousel and a nine-row spec comparison table.
- Built a two-edition product selector (Blackout / Bonewhite) and a three-tier subscription pricing matrix — one-time, monthly and annual — with live currency conversion, cost-per-wash and savings badges.
- Added impact stats, testimonial slider, accordion FAQ, 15%-off newsletter capture and a footer with Vipps, Klarna, Apple Pay and card payment badges; set up products and direct checkout for European and Nordic markets.

Clocked & Blocked — *women's print-to-order apparel and accessories* · Essence theme *demo store*

- Built a two-level mega menu separating product types (belt bags, hoodies, tanks, tees) from six named capsule collections — Cheat First, Keep That Same Energy, LOL, NAH, Rent Is Due and Send Money.
- Built the homepage from four full-width hero banners with separate desktop and mobile artwork, a scrolling slogan marquee, a three-tile essentials row, a six-tile capsule grid and a "Hot Right Now" product carousel.
- Added numbered capsule cards with from-pricing, a verified-review section, wishlist page, cookie consent banner, cart drawer with empty state, customer accounts and newsletter capture.

Kosmeo — *handcrafted leather sandals with interchangeable Klips* · Dawn theme *demo store*

- Built the storefront around an interchangeable-product system — a Sandals / Klips / Bundles category structure with dropdown navigation, and a scrolling announcement bar rotating shipping and size-exchange offers.
- Built the homepage as a full-bleed hero slider, three-tile category row, a "Klip system" explainer banner, a two-column colourway comparison (The Brown / The Black), a "Start Here" product row and shop-the-look lifestyle tiles with clickable product hotspots.
- Set up market and language selectors for Australian pricing, plus size guide, returns and exchanges, shipping and brand-story pages, and footer newsletter capture.

Haven Forged — *outdoor gear — handcrafted axes and Damascus knives* · Dawn theme *demo store, in development*

- Built the storefront structure on Dawn — three full-width hero banners, a shop-by-category grid, and multiple product carousels across trending, best-selling and top-picks sections.
- Set up product pages with multi-image galleries and sold-out states, plus a blog section, trust-badge row (free shipping, 24/7 support, secure payment, money-back guarantee) and newsletter footer.
